FINCONECTA

FinConecta is looking for Platform Developer
La Paz, Bolivia
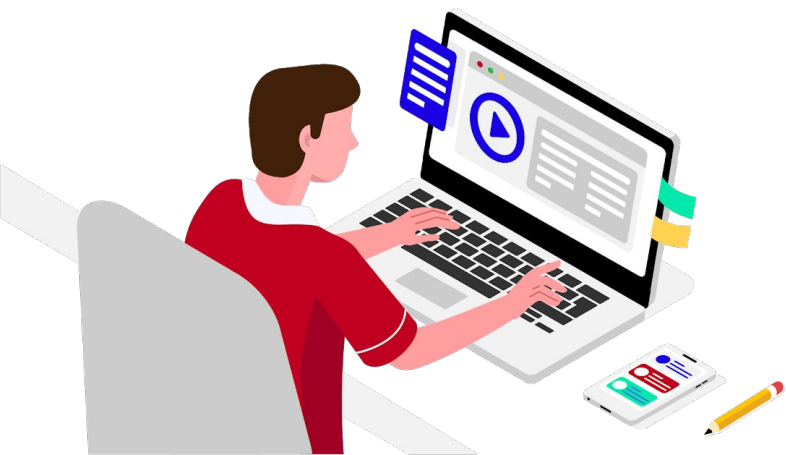

FinConecta (www.finconecta.com), a global technology company, is looking for a Platform Developer in La Paz, Bolivia, that will be responsible for the design, development, and support of components for a global financial switching platform.

To succeed in this role, the ideal candidate needs to be someone that thrives to work in a fast paced, goal oriented environment that allows you to excel in your area of expertise, and liaise with other professionals in multi-disciplinary initiatives.

The ideal candidate must have a solid 2+ years experience with data scraping frameworks including the handling of captcha, machine tagging, Javascript, and other parsing block techniques.

The activities that the Platform Developer shall conduct are:

- Develop feature and/or enhancements of existing components
- Ensure proper integration of developed components to the platform
- Troubleshoot environment and/or component failures for the entire ecosystem
- Support the integration of Financial Institutions to FinConecta's middleware, as well as ready-to-consume products, leveraging screen scraping
- Maintain and develop API Gateway including support to FinTechs integrating to the platform
- Ensure high quality of the components that are deployed into the ecosystem (either internal or external to the platform)
- Other duties as assigned
