

FinConecta is looking for
Sr. Front-End Web Developer
Argentina, Bolivia, Mexico or Colombia

FinConecta (www.finconecta.com), a global technology company, is looking for an experienced and talented Senior Front-End Web Developer to create and shape unique, user-centric digital products and experiences.

The ideal candidate has experience working in agile teams, implemented user interface and engineered the experience sites/software being put out by the business. S/he constantly evaluates emerging technologies and avails strategic, innovative, and cost-effective solutions to increase efficiency, reliability and seamless integration of different components of the experience.

The activities that the Senior Front-End Web Developer shall conduct are:

- Work with product managers and SMEs to understand the financial industry and customer needs
- Code, develop unit tests and ensure implementation of software into production goes smoothly alongside business stakeholders, QA, and other developers
- Evaluate existing applications and their UX effectiveness
- Communicate scenarios, end-to-end experiences, interaction models, and screen designs with other members of the team
- Research and engage in emerging technologies
- Consistently provide innovative and creative ideas, putting forward imaginative alternatives and questioning traditional approaches
- Construct application pages based on principles of good design, usability and fast system performance
- Refine website specifications and resolve technical issues, on the client and server side of development, running functionality tests and debugging code. Identify user and system requirements for new websites and applications.

The requirements that the candidate shall meet are:

- Bachelor's degree
- 5+ years hands-on experience creating high performing and complex web applications
- Be a collaborative individual with excellent verbal communication, a problem solving mindset, have a business-minded approach to deadlines
- Agile/SCRUM development process, excellent organizational and time management, responsive design implementations, fluency with UI design specs
- Manage: JQuery, JSON, ReactJS, Node.js, MongoDB, Express.js, Java, JavaScript, HTML5, CSS, RESTful API architecture, cloud hosting (AWS, and/or Azure preferable)
- Fluent in Spanish and English
